Introducing Living Lab REGENERA an open-air laboratory for urban regeneration and co-creation in Piazza della Scienza

Piazza della Scienza underwent an ecological transformation in 2024, thanks to the multidisciplinary project MUSA (Multilayered Urban Sustainability Action) and the combined efforts of UNIMIB, Regione Lombardia, researchers throughout Milan and the local community of Bicocca. It was also the foundation for the on-going study of the role that biodiversity plays in providing ecosystem services to urban environments and established a co-creative experimental space. The legacy of MUSA is the ENoLL certified REGENERA that we will present to you today. We will explain what the Living Lab certification and framework means, the governance structure of REGENERA and opportunities to get involved.

Thursday
December 3, 2026

4.30 pm
to 5.30 pm

U1 building
room 10

Host:
BtBs - Unimib

The certificates of attendance for the seminar are also valid for the acquisition of CFU credits
